

Climate Change:

Individual Actions Make a Difference

JANUARY 27, 2021

7:00 PM

Elvia Thompson

Co-Founder & President of
Annapolis Green

Nature lover, scuba diver,
world traveler, sailor

Our first EYC Environmental Lecture for 2021 will be by Elvia Thompson, Co-Founder and President of Annapolis Green. Elvia has over 25 years of government experience as an analyst specializing in translating technical information into plain English. Given Annapolis Green's mission to connect, inform and inspire Annapolis area residents to care for the environment, it is very appropriate that we hear her thoughts on climate change and what actions we can take in our daily lives to mitigate its effects. Elvia was trained to be a climate change advocate by former Vice-President Al Gore who received the Nobel Peace Prize for his work on climate change. With President-Elect Biden's commitment to rejoining the Paris Climate Agreement, it is an exciting time for all of us who care for the environment. Don't miss this timely and inspiring presentation.
